### STYLPLAST Lawn and Path Edging

#### Description:

This stylish contemporary edging is made from recycled grey plastic. It is perfect for delineating lawns from flower beds or for creating garden pathways. It is easy to install, easy to cut, yet strong and highly flexible. Resistant to garden strimmers and to harsh weather.

It is designed on the same profile as its big sister AluStyle. The use of recycled PVC gives it unparalleled flexibility, without shape memory. Like the Alustyle, the StylPlast is equipped with a slide allowing the galvanised pegs to be installed along the entire length of the profile.

#### Applications:

- Gravel Pathways
- Soft Landscaping
- Lawns and Borders
- Straight Edges
- Curved Edges

#### Features:

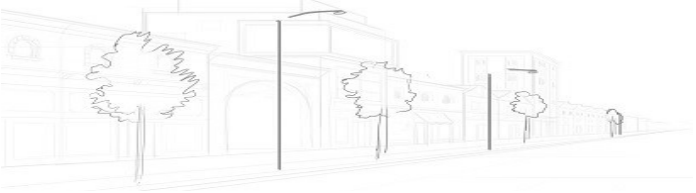

- Does not rust, rot, or crack
- Frost resistant
- Permanent installation
- Light and flexible
- Easy to install
- Environmentally friendly
- 100% recyclable
- Variable fixing Points
- Non toxic
- Easy to cut

#### Colours:

Stylplast Grey
